Summary

Pursuing an **M.S. in Computer Science** at **Cal State Fullerton** with **2+ years of industry experience** building full-stack web applications using **React, Node.js, and Python**. Passionate about building **performant, user-friendly products**, integrating **AI-powered features** into applications, and currently seeking **software engineering roles**.

Technical Skills

Languages: C, C++, Java, Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Web Accessibility (WCAG)

Backend & Databases: Node.js, Express.js, Django, Spring Boot, RESTful APIs, PostgreSQL, MySQL, MongoDB

Tools & Platforms: Git, Figma, WordPress, Docker, AWS, Google Analytics, OpenAI APIs

Experience

Software Developer — SAAA Consultants

Jun 2023 – Jul 2024

- Served as the **second most senior developer** on a **5-person tech team**, taking ownership of **end-to-end website development** for **20+ client projects** across diverse industries.
- Architected and delivered **fully functional, maintainable websites** using **React, Node.js, and MySQL**, driving a **3x increase in client website traffic** through performance optimization and UI/UX improvements.
- Led **2–3 client meetings per week**, translating business requirements into technical solutions and serving as the **primary technical point of contact** for multiple concurrent projects.
- Reduced page load times by **45%** through frontend optimization, lazy loading, and efficient API design, significantly improving user experience and retention.
- Acted as the **cross-functional bridge** between tech, design, and marketing teams, ensuring consistent delivery of projects on time and aligned with client brand guidelines.

Software Developer & Tech Lead — Fineappl

May 2022 – Dec 2022

- Joined as the **first employee and sole technical founder**, built the engineering function from the ground up and grew the team to **5 people**.
- Served as **Tech Head**, making all architectural decisions for a **mental health application**, working directly with the **CEO** to align product and technical strategy.
- Successfully led and completed the **full migration of the app to Flutter**, improving cross-platform performance and maintainability.
- Increased **weekly active users by 70%** through UI/UX improvements, offline-first data handling, and background synchronization for low-connectivity environments.
- Wore multiple hats beyond engineering — contributed to **marketing strategy and hiring decisions**, helping shape the company's early culture and growth.

Python Developer Intern — Cyberrace Infovision

Mar 2020 – Jun 2020

- Developed a **Python analytics tool** using **Tkinter and MySQL** to visualize datasets.
- Automated **data validation and processing**, improving accuracy and reducing manual work.

Instructional Lab Assistant — California State University, Fullerton

Aug 2025 – Present

- Assisted in teaching **CPSC 120 and CPSC 121**, focusing on **programming fundamentals and problem solving**.
- Guided students in writing, debugging, and understanding programs using **C++**, reinforcing **object oriented design, memory management, and control flow**.

Volunteer Instructor — Learning by Locals NGO

Mar 2021 – May 2021

- Taught **web development fundamentals**, including **responsive design and clean coding practices**.
- Designed structured lesson plans and hands on exercises to help students build **real frontend projects**.

Internship Program — Harrisburg University

Jun 2019 – Jul 2019

- Built mini projects using **algorithms, data structures, and Python-based machine learning** to solve real-world problems.
- Gained hands-on experience with **machine learning models and data processing workflows**.

Education

California State University, Fullerton — M.S. Computer Science

Aug 2024 – May 2026

University of Mumbai — B.E. Computer Engineering

Aug 2018 – May 2022
